

Nimble and OPEX Sign Reseller Agreement

Moorestown NJ and Markham, Ontario Canada – October 5, 2017– OPEX® Corporation and Nimble Information Strategies Inc. have entered into a business relationship that allows the Canadian-based document management provider to resell OPEX Universal Document Scanning Workstations.

“Nimble is thrilled to be partnering with OPEX Corporation,” said Daryl Stott, Vice President, Digital Transformation for Nimble. “The synergies this collaboration provides builds on our focus to provide Nimble’s customers with industry leading tools and expertise for high-speed and high-quality digital mailroom automation and data capture processes.”

Opening and prepping documents by hand is costly and inefficient, as is manual data entry, paper-based routing and hunting for misplaced documents. With the OPEX Falcon® series of scanners, one operator can remove documents from envelopes or file folders and scan at the same time. This significantly reduces those manually intensive document prep steps.

“We are excited to welcome Nimble to the OPEX family of resellers,” said Rich Roy, Business Alliance Manager for OPEX. “The depth of products and experience that Nimble brings to the relationship aligns perfectly with our prep-reducing scanning workstations. We look forward to working with Nimble to create leading-edge solutions to meet the document imaging needs of current and prospective customers.”

About Nimble

For over 20 years, Nimble has specialized in digital imaging and information management solutions. Hundreds of organizations trust us with their vital information as we combine decades of experience with the latest scanning and data capture technology. As one of Canada’s largest scanner sale and service organizations, we deliver the most convenient, and cost-effective document imaging service available.

With three full-service facilities and over 200 staff, Nimble offers the most complete range of professional and secure document scanning services in Canada. Start your digital transformation journey with a digital mailroom, or process your invoices in half the time. Control your information wherever you are, securely, quickly, and accurately. We help organizations to be nimble.
